

HEALTHCARE FACT SHEET

The Rx for Healthcare Security

The Problem:

- An estimated \$4,000 of equipment is lost per bed in the average U.S. hospital annually.
- 64% of 100 surveyed hospital executives reported that items were stolen by patients and/or family members (VHA Inc.).
- Patient theft costs U.S. hospitals \$52 million per year.

Designers, architects and internal decision makers for healthcare facilities need an integrated solution to:

- Improve patient safety
- Secure medications, medical and janitorial supplies, labs, patient records, and patient belongings
- Enhance patient care and experience
- Comply with Joint Commission, HIPAA and other regulations

“There is a demand for integrated locking solutions that keeps contents safe and easily accessible in the healthcare sector – Senseon meets that need.”

- Sid Kalantar, Vice President of Sales and Marketing, Senseon Secure Access

The Solution:

[Senseon® Secure Access](#), a keyless, hidden, RFID-based electronic locking system that combines extraordinary ease, efficiency and elegance

Benefits:

- Greater patient safety
- Optimal patient experience
- Streamlined operations
- Lower risks of noncompliance with CMS, Joint Commission and HIPAA regulations

Designed to address healthcare challenges, Senseon strengthens security where you need it most. It's ideal for emergency rooms, general clinics, pediatric facilities and long-term care facilities.

About the system:

- Integrates seamlessly into a cabinet, connecting directly to the existing access control system or serving as a stand-alone. Hidden inside a cabinet drawer or door, it provides a clean front, unmarred by hardware.
- Auto-Relock, Auto-Open and Optional-Touch-Release features.
- Easy access management. One RFID reader opens or locks up to 15 drawers or doors. RFID cards, fobs, tags or wristbands grant access to authorized staff. Administrators can add, remove or change users in minutes.
- Reduces risks of patients accidentally ingesting medications or cleaning supplies, or losing personal property to theft.
- No knobs or handles to invite unwanted entry.
- Complements cabinetry of all shapes, sizes, materials and designs.

- Easy to install. No need for electrical or wiring knowledge, or firmware or driver updates.
- Modular, adaptable and user-friendly.
- Four times the strength of a conventional lock.
- Impervious to power outages.
- Promotes a serene, stress-free atmosphere.
- Backed by patented, proven technology from world-leading [Accuride® International](#).
